1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 11-19 and 42-44, drawn to a method for inactivating microorganisms, or disinfecting, an electrodeionization device, classified in class 422, subclass 1.
 - II. Claims 6-10, 23-25, 30, 34 and 38-40, drawn to a method for purifying water, classified in class 210, subclass 748.
 - III. Claims 20-22, 26-29, 31-33, 35-37 and 41, drawn to an electrodeionization device, classified in class 204, subclass 638.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. Although both inventions involve an electrodeionization device in some way, the first invention has the function of treating the device, and the second invention has the function of treating water.

Inventions I and III are related as process and apparatus upon which the process is carried out. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to

practice a materially different process, such as a process for using the device that does not include disinfecting the device or inactivating microorganisms therein.

Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice a materially different process, such as a process for treating a non-aqueous fluid.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betsey Hoey whose telephone number is (703) 305-3934.
